

Family Protection and Preservation Bureau

### **BUREAU OF FAMILY PROTECTION AND PRESERVATION**

FSSA's Bureau of Family Protection and Preservation (BFPP) and The Division of Family and Children local offices serve children in the state who are at risk of abuse or neglect and children and their families where abuse and/or neglect has been substantiated. The BFPP administers programs that provide family services, child abuse prevention services, foster care, adoption, independent living, residential licensing, residential investigations, and other youth services.

The Family Preservation Program provides services to prevent out-of-home placement or to reunify children and their families in cases of substantiated reports of child abuse or neglect. Program services offered to families include education, counseling, visitation, sexual abuse treatment, parent aides, homemaker services, and home-based family services.

The program carries out these goals by providing four (4) basic services: Service Referral Agreements, Informal Adjustments, Services to a Child in Need of Services (CHINS) and Reunification Services.

- Service Referral Agreements voluntary agreements made by the family case manager, parent(s) and other involved parties when a family admits to a problem, the child is not at serious risk in the home, and no court involvement is sought.
- Informal Adjustments agreements made by the family case manager, the child's parent(s) guardian, custodian, attorney and other involved parties when a family admits to a problem and the child is at minimal risk in the home. The agreement is filed with the juvenile court, must be approved by the court, and may include many of the above-noted services.
- Services to a Child in Need of Services (CHINS) services to children made wards of the court include case planning, periodic case review and many of the services mentioned above. The objective is to return children to their families through the provision of services to the child and family.
- Reunification Services services provided to families when a child who has been removed from the
  family has a goal to return to the family. Any or all of the above-noted services may be offered. The
  objective is to reunify children and their families in cases of substantiated reports of child abuse or neglect.

Approximately 12,500 children and their families are being actively served at any given time. The state of Indiana has developed a five- (5) year plan for family preservation and support services with the help of local Step Ahead councils and local service needs assessments. The five- (5) year plan is funded by federal Title IVB Part II monies.

### Children in Need of Services (CHINS) by Type of Placement

	Total CHINS	Foster Homes	Residential Care	Own Home	Relative Home	Other
March 2003	10,793	4,320	1,391	2,968	909	1,205
March 2002	9,981	4,109	1,315	2,594	850	1,101
% Incr (Decr)	8.1	5.1	5.7	14.4	6.9	3.4

<sup>\*</sup>Based on data from ICWIS and reflects a point in time.

The Family Preservation Program provides services to prevent out-of-home placement or to reunify children and their families in cases of substantiated reports of child abuse or neglect. Program services offered to families include

education, counseling, visitation, sexual abuse treatment, parent aides, homemaker services, and home-based family services.

Family preservation expenditures largely reflect the cost of home and community-based services to children and their families who are under the supervision of the local office of family and children (court) and have been placed in their own homes. However, some of these costs are spent on home and community-based services to families of children who have not yet been returned home. The purpose of these services is to prepare the family for the return of the child.

#### **CY 2002 Identified CHINS Costs**

(Family & Children Fund)

Foster Homes Relative	4,239,002
Foster Homes Non Relative	24,820,858
Therapeutic Foster Homes	42,488,278
Residential Facilities	101,635,371
Independent Living	367,603
Preservation Services	15,901,499
Misc. Cost	6,174,904
Total CHINS	195,627,515

As reflected in the table above, the cost of care for children in out-of-home placement is much greater than the cost of providing care to children at home. For example, in March 2002, nearly twice as many Children in Need of Services (CHINS) were being served in their own homes compared to being served in residential facilities. The annual cost for residential facilities care in 2002 was more than six times greater than that of preservation services.

Source: Governor's Commission on Home and Community Based Services Data Book 6/17/03.

CPS operates a toll-free hotline (1-800-800-5556) for people to call and report suspected cases of child abuse or neglect on a statewide basis. Although reports can be made in person or by correspondence, the vast majority of child abuse and neglect reports are made by telephone. CPS receives and initiates investigations of abuse reports on a 24-hour basis.

Investigations of abuse or neglect may be substantiated or unsubstantiated. The child's safety is the primary factor in all CPS investigations. Families receive services based on the severity of the abuse or neglect, an assessment of the child's and the family's needs, and an assessment of the relative safety and risk to the child in the home.

In 1995, there was a high of 69,458 reports of neglect and abuse; that has decreased to 61,369 in 2002.

The Institutional Child Protection Services Program serves children who allegedly have been abused or neglected in any institutional or out-of-home care setting. Reports are received via a statewide hotline, and investigations of abuse are initiated within 24 hours. This program determines whether the child should remain at the facility or home, whether adequate protection can be provided, whether referrals are needed for follow-up monitoring, and whether referral for prosecution of perpetrators is warranted (substantiated cases).

Facilities could include Child Care Center (licensed and unlicensed/exempt), Child Care Home, Foster Family Home, Registered Child Care Ministry, Residential Facility, School, State Institution, Hospital, Other.

Perpetrators could include facility staff and other residents.

A child fatality review process has been in place since SFY 1999 to improve information gathering and prevention strategies in the area of child fatalities due to abuse and neglect. A state team reviews detailed information regarding each death involving substantiated abuse and neglect and shares aggregated information with partners, including Prevent Child Abuse (PCA) Indiana, to develop prevention strategies.

#### Children's Trust Fund

The Children's Trust Fund collects revenues from the "Kids First" license plate and distributes the funds through grants

to agencies dedicated to preventing child abuse and neglect.

The goal of the Children's Trust Fund is to provide primary and secondary prevention services to Indiana's children to help ensure that they are not abused or neglected. Children's Trust Fund grant recipients work to provide practical solutions that teach good parenting skills, including the importance of nutrition, how to be an active parent and how to discipline without spanking the child. Other programs provide children with encouragement that helps them grow up healthy and break the intergenerational chain of abuse and neglect.

The CTF sends contributions from Kids First license plate sales directly to local community programs that prevent the tragedy of child abuse and neglect.

Income for the Children's Trust comes from "Kids First" plate sales, fee collections (marriage & divorce filing fees), heirloom birth certificate sales, cash donations and interest.

<u>Indiana's Foster Care Program</u> provides 24-hour care to children who can no longer safely remain in their homes due to the occurrence or risk of abuse or neglect, or due to their own need for care and treatment for behaviors which constitute a danger to themselves or others.

Children may be placed in an approved relative home, a licensed foster family home, a group home or child-caring institution, or other court-approved facility.

State policy is to place children in the least restrictive, most family-like setting which meets the child's needs. When possible, a child is placed in close proximity to the child's family, particularly when reunification with the family is the case plan goal.

Foster parents and other care providers work to help reunite a child with a biological parent, or care for a child until that child is adopted. Foster parents and child care professionals are involved in case planning and provision of services to the child and the child's family utilizing a team approach with the child's case manager. Local DFC staff ensure that foster parents receive proper notification concerning case activities of children in their care.

The number of homes, agencies and facilities continues to increase. The number of foster homes licensed by the Division of Family & Children or by child placing agencies is the highest if has ever been at 4,271. The decrease in homes in 1998 to 2,625 was caused by the great increase in the number of adoptions in 1998 brought about by the Adoption and Safe Families Act (ASFA). A significant number of children were adopted by foster parents who, in some cases, stopped being foster parents and focused solely on being adoptive parents.

The Title IV-E Foster Care Program provides federal funds for foster care or residential care per diem payments and for medical services for children whose families were receiving Temporary Assistance for Needy Families (TANF) on their behalf, or would have been eligible had they applied at the time the court ordered the children removed from their homes.

By claiming federal IV-E reimbursement local DFC offices can maximize the financial resources available to serve children and families in their communities. Eligible services include maintenance payments such as food, clothing, shelter, daily supervision, school supplies and liability insurance. Also included are Medicaid services.

### Child Welfare Rehabilitation Option (CWRO)

The Child Welfare Rehabilitation Option is a new Medicaid waiver option that will provide clinical mental health services to individuals living in the community or in Residential Treatment Facilities who need aid intermittently or on a twenty-four hour a day basis for emotional disturbances or mental illness. Medicaid reimbursement will be available to current DFC licensed facilities and licensed child-placing agencies (LCPA). Indiana is requesting this option in order to leverage federal dollars. Currently, the majority of the costs of these services are being paid with county funds. This waiver should be available sometime in CY 2003.

### **IV-E Waiver Program**

In July 1997, the federal Department of Health and Human Services approved Indiana's application for a Child Welfare Demonstration Project, also known as the IV-E Waiver Project. The waiver redesigns the current federal reimbursement

system for funding children's services. It emphasizes a more aggressive development of a family focused, community based service delivery system for children in care. The goal of the waiver is to stimulate the growth of community based children's services, thereby shifting significant costs from out-of- state and out-of-county placement options to more locally based and in-home programs. Each child in the project must have a plan for services approved by the local judge with juvenile jurisdiction.

The project was implemented in a phased approach covering all 92 counties over the course of calendar year 1998. The demonstration project is tentatively scheduled to conclude in December 2003 and will be the subject of a third party evaluation as to its effectiveness in improving family functioning, reducing child abuse and neglect, and expediting more permanent placements for children in a family setting through family reunification, adoption, guardianship, or independent living.

Indiana was the seventh state to have been approved for the IV-E Waiver Project and the only one whose waiver program is statewide. Indiana's project was the largest in scope and involved the use of foster care funds in a more flexible approach to meet the needs of children and their families. Interagency agreements for the waiver are in place in each of the 92 counties between the local judge, probation officers and the local Director of the Office of Family and Children. The waiver applies to 4000 children at any given time and does not require that the children be removed from the homes in order to access federal funds.

#### **IV-E Reimbursement**

The claiming of federal IV-E reimbursement is a high priority for the Division. By doing so effectively, local offices can maximize the financial resources available to serve children and families in their local communities. Reimbursement claims are possible in a case when there is a combination of an eligible child, an eligible facility and eligible services.

For a child to be eligible, he or she must be under age 18 and must meet 1996 AFDC eligibility requirements at the time of removal. In addition, there must be a judicial finding in the child's case that it was contrary to the child's welfare to remain at home and that the state provided services to prevent the child's removal from home, or that reasonable efforts to return the child home were not required. Reimbursement claims are possible in a case when there is a combination of an eligible child, an eligible facility and eligible services.

A facility is eligible if it houses no more than twenty-five children. In addition, the facility must be licensed by the state, and must not be primarily for detention purposes. Eligible services include maintenance payments such as food, clothing, shelter, daily supervision, school supplies and liability insurance. Also included are Medicaid services.

#### **Adoption Program**

Indiana's Adoption Program serves children who are legally available for adoptive placement and who need a permanent family. The State Adoption Program includes recruitment activities and services to the prospective adoptive family, as well as financial support and services to the family receiving the child.

The objective of Indiana's Adoption Program is to find permanence with a family for all Indiana children who are legally available for adoption. Finalized adoptions have increased since 1990 and have remained above 1,000 adoptions per year since 1999, which is a 280% increase. 2001 was the first time in 8 years that the number of adoptions decreased. The decline reflects stabilization in the system after a period of growth spurred by the implementation of the federal Adoption and Safe Families Act in 1997, which is intended to promote permanency planning.

Many of the children in the state system are considered special needs children – children over two years of age, member of a sibling group, or with a mental, physical and/or emotional challenge – who can be more difficult to place. To accommodate the needs of these children, the Special Needs Adoption Program (SNAP) was implemented in 1990 to recruit adoptive families for this special population.

### **Special Needs Adoption Program**

The Special Needs Adoption Program (SNAP) implemented in 1990 recruits adoptive families and facilitates the adoptive placement of children with special needs.

The adoption program works in partnership to recruit minority adoptive families, facilitate the adoptive placement of children with special needs and provide the community at large an educational service regarding the needs of adoptive children. Special needs children are usually age 2 or older. Many are of minority background, members of a sibling group that want to be placed together and/or have been diagnosed with developmental, psychological or medical/physical challenges. It is rare that a child involved with DFC for adoption does not have some type of special need.

The Special Needs Adoption Program employs regional adoption casework specialists to recruit adoptive families as well as work with children and families in order to facilitate the adoptive placement of children who have special needs.

The adoption program also works in partnership with the Indiana One Church, One Child Program, Inc; the Children's Bureau of Indianapolis, Inc; the Villages of Indiana, Inc; Children are the Future, Indiana Youth Advocate Program, and the Indiana Foster Care Association to recruit adoptive families.

Indiana's adoption initiatives have resulted in an increase of finalized adoptions from 464 in 1996 (prior to state funding launching these initiatives) to 1246 in 2000, 1076 in 2001 and 961 in 2002.

All DFC Children (including SNAP) finalized adoptions

1990	) 1	1991	1992	1993	1994	1995	1996	1997	1998	1999	2000	2001	*2002
196	,	212	312	237	296	338	464	592	774	1014	1246	1076	961

Figures are based on a **calendar year** and do not include private adoptions.

\*Source: ICWIS \*\*1990-2001 reporting based on numbers self reported by local offices for all children in DFC custody who were adopted.

Financial assistance programs available for families who adopt eligible special needs children include:

- **Non-Recurring Adoption Expenses Program** provides funds to reimburse the adoptive parent for one-time expenses incurred in legally adopting a special needs child.
- **Federal Adoption Assistance Program** provides financial assistance to families who adopt IV-E eligible children via per diem payments and medical assistance.
- County Adoption Subsidy Program provides financial assistance to families who adopt children with special needs and demonstrate to the court that per diem and/or medical assistance is needed in order to meet the adopted child's needs.

The Indiana Adoption History Program was established as a result of enabling legislation passed in 1993. The purpose of this program is to assist persons seeking information regarding adoptive situations to which they were a party. The Indiana State Department of Health (ISDH) is responsible for administering the program, but the county DFC offices play a major role in assisting persons to obtain information not available through ISDH. Parties to an adoption may obtain non-identifying information from the county offices without a court order if it is available. However, no identifying information may be released by a county office without obtaining permission from ISDH to do so, since certain signatures must be on file before identifying information can be released.

The Interstate Compact on the Placement of Children is designed to protect the interests and safety of all children who are being placed in out-of-home care or for adoption across state lines and national boundaries. This compact provides a mechanism for the approval of the placement of children into relative, foster, or adoptive homes or into residential facilities and for on-going monitoring of the child's progress in these out-of-state placements.

**The Residential Licensing Sections** of the Bureau have licensing authority for a number of facilities and homes. The primary purpose of licensing of foster family homes is to minimize the risk to children in out-of-home care by monitoring and enforcing compliance to minimum health, safety, and program standards as established in 470 IAC 3-1. Local Offices of Family and Children and licensed child-placing agencies have the responsibility and the authority to assess compliance with these standards and to submit licensing recommendations to the Bureau of Family Protection and Preservation.

Also, the section collaborates with the State Fire Marshal's Office, the State Department of Health, and the office of the State Building Commissioner. These cooperative efforts ensure that minimal standards of fire and building safety and public health protection are maintained for children in child (day) care centers and homes.

The Section also issues licenses to residential child care institutions and group homes. Child caring institutions are agencies which provide 24-hour residential care for dependent, neglected, abused, delinquent, or troubled children who are unattended by a parent, guardian, or custodian. The minimum standards for child institutions servicing 11 or more children are found in 470 IAC 3-11 and 470 IAC 3-12. The minimum standards for group homes (agencies serving ten or fewer children) are found in 470 IAC 3-14 and 470 IAC 3-15. The Bureau also has authority to license private secure facilities. The minimum standards for private secure facilities are found in IAC 470 3-13.

The Division of Family & Children in conjunction with state fire inspectors monitors and reviews compliance to these standards at least annually in an effort to maximize the health, safety, and well-being of children placed in these residential treatment programs.

Division staff additionally issues licenses to child-placing agencies. Child-placing agencies are authorized to recruit foster parents and to make foster family home licensing recommendation to the DFC, to complete adoptive home studies, and to place children in either foster homes or adoptive homes. Some child-placing agencies provide only foster care services while others provide both foster care and adoptive services including therapeutic foster care and international adoptions.

#### **Assisted Guardianships**

Assisted Guardianship is a possible permanency option for children under the supervision of the Division of Family and Children, and is considered when a child is placed with relatives who promote a permanent, long-term living arrangement that is in the best interest of the child.

This option is available after a court has determined that reunification with the child's parents is no longer feasible, and that adoption is not in the best interest of the child. Both the child and the relatives must meet specific eligibility requirements, and the program calls for a monthly subsidy to be provided based on the need of the child as defined by Temporary Assistance for Needy Families (TANF) guidelines.

#### **Independent Living Program**

The Title IV-E Independent Living Program provides the state with funding to purchase direct services for all youth (ages 14-21) living in foster or residential care who are in need of independent living skills. Services that are purchased through this program include counseling and support groups, vocational training, daily living skills and job search skills. The goal of the Title IV-E Independent Living Program is to obtain services for youths living in substitute care who are in need of independent living skills. Services are planned and purchased by the Child Welfare Executive Committee in each region and through a competitive negotiation process with licensed child-caring institutions for this program.

Contracts and Grants are administered through the Bureau, and responsibilities for the ten funding sources are contracted out to private agencies throughout the state for the provision of direct services. The federal funding sources are:

- Chafee
- IVB I & II
- Social Services Block Grant
- Community Based Family Resource and Support Grant
- Preventive Health Block Grant (Sex Offense Services)
- Family Violence Prevention and Treatment Grant

The state funding sources are:

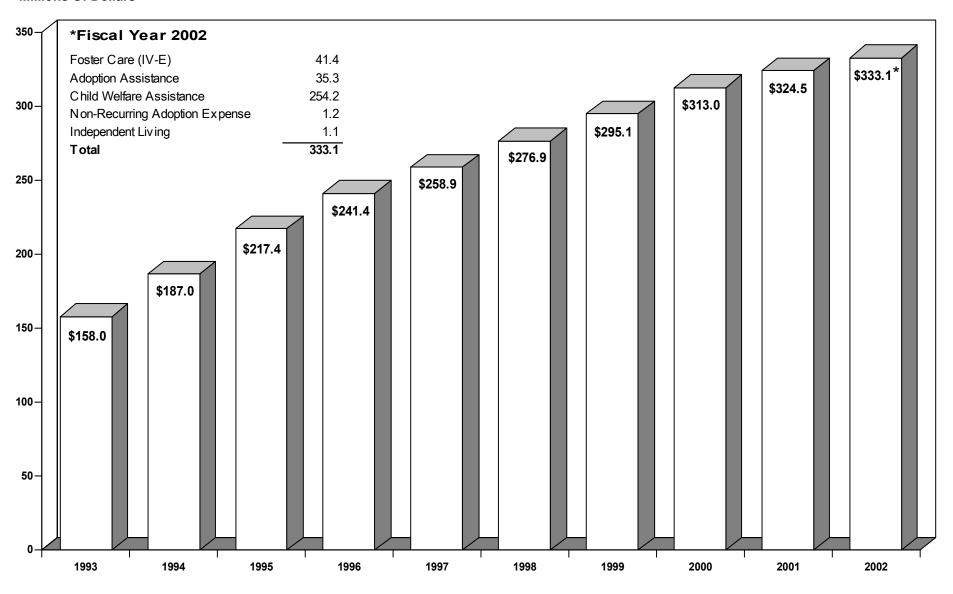

- Domestic Violence Prevention and Treatment Fund
- Project Safe Place
- Youth Service Bureau Fund
- Children's Trust Fund (license plate sales and other donations)

These funds are allocated on a competitive basis to agencies providing services in these categories:

- Domestic Violence Prevention and Treatment Fund
- Family Planning, Youth Services, Child Abuse Prevention, Families and Children Services and Sexual Offense Services
